

Dear Nina Thompson,

Per your request, we took the time to implement more features in order to further accommodate users with specific needs.

We have homed in on three specific changes in order to further enhance the experience of users on your website which will be detailed below.

firstly, we have enlarged important pieces of text across the three webpages so that visually impaired users will be able to navigate the website with ease.

Next, we increased the size of navigational buttons so that users would be able to access the various functions of the website.

We believe that these additions will allow users to more easily use your new website.

Finally, we restructured our homepage so that it would be more easily navigable for someone with dyslexia.

We hope you are happy with our additions and look forward to hearing back from you

Regards,
Skiff Team
